

Ahmed Alsabbahy

Senior Backend Engineer · Distributed Systems · AI-Driven Platforms

ahmed.alsabbahy@gmail.com · +20 122 223 4824 · linkedin.com/in/ahmedmostafaalsabbahy · ahmed.alsabbahy.com · Giza, Egypt · Open to Remote / GMT+3

Professional Summary

Senior Backend Engineer with 8+ years designing and scaling high-performance backend systems and APIs. Deep expertise in Python, Node.js/NestJS, FastAPI, PostgreSQL, and AWS, with a strong track record in microservices, observability (LGTM), AI/LLM pipelines, and CI/CD. Owns services end-to-end — architecture through production — in startup and high-autonomy environments. Passionate about clean architecture, system reliability, and mentoring engineering teams.

Core Skills

Backend: Python, Django, FastAPI, Node.js, NestJS, Express, TypeScript

Architecture: Microservices,DDD, Clean Architecture, Event-Driven (Kafka/BullMQ), AI Orchestration, Serverless, TDD

Databases: PostgreSQL, MongoDB, Redis, DynamoDB, Prisma, SQLAlchemy, Drizzle

Cloud & DevOps: AWS (ECS/Fargate, Lambda, RDS, S3, CloudFront...), Docker, Kubernetes, CI/CD, Terraform

Observability: LGTM (Loki, Grafana, Tempo, Mimir), OpenTelemetry, FluentBit, Structured Logging, Tracing

AI & Data: LLM pipelines, Whisper ASR, Embeddings/summarization, n8n automation, Prompt orchestration

APIs & Payments: REST, GraphQL, gRPC, WebSockets, OAuth2/JWT, OpenAPI, Stripe, Paymob, PayPal, Fawry

Frontend: React, Next.js, Redux, TanStack

Professional Experience

Senior Software Engineer

Netguru | Apr 2025 – Present | Remote

- B2B contractor for DigitalZone Iraq as Senior Backend Engineer (Node.js/NestJS) on a multi-tenant e-commerce platform (consumer, merchant, dashboard APIs).
- Owned Checkout.com Flow payment sessions: tokenization, 3DS, webhooks with signature verification, abandoned-session processors, and payment-method routing.
- Built and maintained NestJS modules on Prisma/PostgreSQL with BullMQ workers, Redis caching, Cognito auth, and OpenTelemetry observability.
- Assist partners integrating published APIs; ensure reliable third-party connectivity and clear API contracts.
- Translate product requirements into SRS/technical plans; conduct peer code reviews and mentor teammates.

Senior Backend Engineer

LXT | Nov 2023 – Oct 2025 | Egypt (Remote)

- Led end-to-end design, development, and delivery of backend products while keeping existing systems stable and scalable.
- Architected RESTful APIs and microservices with clean-architecture principles, TDD, and integration testing.
- Drove observability initiatives (structured logging, correlation IDs, tracing) and reduced operational bottlenecks.
- Mentored juniors via 1:1s, PR reviews, and knowledge-sharing; owned estimations and architectural decisions with Product.

Senior Fullstack Developer

Sword Software Solutions | Jul 2023 – Oct 2023 | Egypt

- Designed RESTful APIs (Django/Node) for internal and partner consumption; modernized legacy React modules.
- Integrated DataDog for server-side request logging and improved system observability.
- Participated in architecture, product discussions, and API technical design with stakeholders.

Backend Engineer

Amjaad Technology | Feb 2022 – Jul 2023 | Cairo, Egypt

- Reduced API latency by 33% rewriting critical services in Node.js; migrated auth to JWT + 2FA.
- Built NestJS microservices for Payments and Notifications; integrated Paymob and Fawry (POS + online).
- Acting Senior (from Feb 2023): monthly 1:1s, code reviews, mentoring; Agile practices improved productivity ~20%.

Software Engineer

Symbios Consulting | Jan 2021 – Feb 2022 | Cairo, Egypt

- Built full-stack MERN/Django apps; delivered RPA for SIDC invoicing and an Azure ML audio filter service (React + Django).

Backend Developer

Override eg | Aug 2020 – Dec 2020 | Cairo, Egypt

- Built NestJS/Node REST backends for hiring, delivery, e-learning, and e-commerce products; integrated PayPal.

Key Projects

ChartiAI — Medical AI Note Platform

Founding / Product Engineering · 2024 – Present

- Built AI medical note generation pipeline (Whisper ASR + LLM summarization) for automated SOAP notes.

- Delivered clinician platform + admin (RBAC, plan management, Stripe billing) with scalable, cost-aware inference architecture.
- Stack: FastAPI/Python, React, TanStack Router/Query, Stripe.

Khuta — Multi-tenant Logistics Platform (KSA)

Full-Stack Platform · 2025 – Present

- Architected pnpm monorepo: Next.js 15 (React 19) frontend + NestJS 11 API for shipments, fleet, and real-time driver tracking.
- Multi-tenant logistics workflows on Supabase auth/DB with Drizzle ORM and shared UI packages.
- Stack: Next.js, NestJS, Supabase, PostgreSQL, TypeScript.

ABMFY — LinkedIn and Email Outreach Automation

Backend Architect · 2025 – Present

- Designed multi-tenant NestJS backend for campaigns, lead intake, enrichment, and sequence orchestration.
- BullMQ workers, Prisma/PostgreSQL, Redis, webhooks, Socket.IO live updates; observability-first (OTEL + LGTM).
- Safety controls: per-channel rate limits, quiet hours, audit trails; AWS ECS Fargate deployment path.

Zillog (LogZilla) — Multi-tenant Observability SaaS

Founder / Architect · 2025

- Built NestJS + Next.js SaaS around Loki/Grafana with tenant isolation, usage tracking, and PayPal billing.
- Plug-and-play logging for Node/Nest apps with JWT tenant context and namespace isolation.

n8n Lead-Gen and Outreach System

Automation Platform · 2026

- Self-hosted n8n + Postgres pipelines: web/Reddit ingest -> LLM qualify -> prioritized outreach drafts.
- Next.js dashboard for stats, lead feed, and draft approve/reject workflow; Docker local-first then VPS deploy.

Education and Certifications

B.Sc. Electrical & Electronics Engineering — Computer Engineering, Modern Academy Maadi, Cairo, 2018

ALX AI Career Essentials — ALX Africa, 2024

Advanced Cloud Developer Nanodegree — Udacity, 2022

Building RESTful APIs with Node.js & Express — LinkedIn Learning

Languages: Arabic (Native), English (Fluent)
